## **Project Results**

- The blueprint for transversal and resilient skills in digital culture.
- Digital pedagogy to support the digital transformation in museums and collections.
- Transversal key competences to motivate
  HED students in digital culture.
- Rewind the museum supply exploiting the powers of the CCI..
- The joint recognition of skills to attract employers and networks.
- Intensive training programme for modern key competences in culture design.

## Objectives

- Research the needs of cultural agencies to develop domain specific innovation liaising results with the workforce.
- Stimulate entrepreneurial mind-sets by involving HED students into a cognitive-inquiry learning
- Improve the transparency/recognition of qualifications/competences in the cultural domains.
- Embracing novel training practices in cultural services and replicate the innovation across the EU

## The project

Digital technologies are omnipresent, whether in science, business, politics or even in the most private spheres. It was though the COVID-19 pandemic that accelerated the pace, making clear that the future will require the workforce to adapt and learn new skills in a fast-moving technological landscape, the cultural sector included. To remain competitive, the cultural domains need to apply the technology-intense-experience to innovate along with an entrepreneurial mindset besides recruiting and retaining talents. Research undertaken however by the Partnership in 2020 has revealed:

- 📀 cultural capital deficit
- 🤣 4th industrial revolution
- 📀 supply- demand divergenge
- violence contamination in the digital sphere
