Why emotions?

The use of an emotion-based application by a destination:

Emotion at the heart of the tourist experience

- We developed and tested the use of an emotion-based app. by a destination (SmartDema).
- Indeed, it is rare for apps. to associate emotions, life moments and values carried by residents with places through geolocation.
- We explore the boundary between experience and emotion.
- **Co-Creation:** The inhabitants co-create and co-value the destination through a digital dialogue with visitors. (Tourism itself is a co-creation process!)
- **Our Strong Proposition/Argument:** Emotion is at the heart of the tourism experience (Aho 2001, Bastiaansen & al. 2019, Knobloch & al. 2017, Tussyadiah 2014)
- Emotions should be an element of destination management programs.

Emotions and Tourism

- Evidence suggests that
 - **Experience** is a process (Aho, 2001)
 - **Experience** is an element of experiential marketing (Knobloch et al., 2017)
 - **Experience** is composite: awareness and mindfulness, attention, memory, **feelings, emotions**, and a cognitive pattern with experience (Skavronskaya et al., 2017)
- **Emotion** is associated in the (tourism) literature with various tourist practices: festivals, shopping, leisure parks, heritage, and adventure (Hosany et al., 2020).
- Emotion has an aesthetic, artistic, literary, musical, spiritual, or cultural origin.
- Emotions shape tourism experiences (Kim & Fesenmeier, 2015; Volo, 2016).
- We consider that **emotion** gives the **experience** its memorable character and, as such, is at the **heart** of the new tourism experience.
- Emotions contribute to creating a lasting memory, thus influencing future behaviour and travel choices.

What is emotion?

- From an etymological perspective, emotion derives from the Latin *motio* 'to move' and 'to emote.'
 - The motto of our Project: 'Stories that move you'

- **Emotion:** is a complex reaction of the individual to a state of the environment or an event (Gauducheau 2008, p. 390).
- An emotion is experienced, felt, and generates sensations and feelings.

Emotions through stories/storytelling

- Emotions are shared with others through storytelling, becoming powerful motivators of future behaviour for self and others.

"People who
acknowledge
and share
their
emotions are
happier than
those who
don't"

With these
emotions comes a
whole new world
of discovery that
begins right here
on SmartDEMA

"The authors
who write
them and the
readers who
read them,
connect us
with our
stories and
connect our
stories with
each other"

Place Attachment

- **Places:** are sources of identification and affiliation that give meaning and purpose to life (Gustafson 2001; Williams & Vaske 2003).
- People develop relationships with places, also known as *place attachment*.
- **Place attachment** : emotional connection between an individual and a particular spatial setting (Williams & al. 1992; Gustafson 2001; Williams & Vaske 2003).

Place attachment "*involves an interplay of affect and emotions, knowledge and beliefs, and behaviors and actions in reference to a place*"
Altman & Low (1992: 5)

- People's relationships with place can represent a range of positive **emotions** from love to contentment (Manzo 2005; Hidalgo & Hernandez, 2001).

How to Capture and communicate emotion???

Observing emotion with emoticons

- Emotion manifests the mental state of the visitor. Today they are expressed on social networks (Facebook, Instagram, Twitter, ...).
- These emoticons can be positive, negative, or relational.
- We need to capture the emotions :
 - **1.** Search in the tone of posts, photos, and messages, the nature of the emotions of what is perceived and experienced by the visitor by analyzing verbal and non-verbal corpus.
 - **2. Focus on emoticons** to express emotions, a state of mind, or a feeling in the digital age.

ASCII: American Standardized Code for Information Interchange. For exemple :) refers to the smiley 😊.

The library is managed by a consortium of major Internet players (Amazon, Apple, Facebook, Google, Huawei, Microsoft, Netflix, Oracle, SAP, etc.) who decide after a long study process if the proposed emoticon can be included in the catalog (<https://home.unicode.org>)

Emoticons in the service sector

Capturing the emotion of visitors via emoticons

- Emotion is complex and composite.
- Emotion reflects several categories of mental dispositions, including the six fundamental facial emotions identified by Eckmann (2002).
- These are joy, anger, fear, sadness, surprise, and disgust. These emotions serve as the basis for the development of other derived emotions. They have a universal character.

Table 1 - Emoticon palette to capture visitors' emotions

<i>Emotions</i>	<i>Emoticons</i>	<i>Natures</i>	<i>Manifestations</i>	<i>Expresses</i>
<i>Joy</i>		Satisfaction, Success, Passion	Happiness, Good mood, Contentment, Interest	A positive emotion
<i>Anger</i>		Frustration, Annoyance	Closure, Nervousness	A negative emotion
<i>Fear</i>		Worry, Concern	Apprehension, Mistrust, Fear	A negative emotion
<i>Sadness</i>		Loss, Disappointment	Unsatisfaction, Affliction	A negative emotion
<i>Surprise</i>		Unexpected, Revelation, Astonishment	Enthusiasm, Wonder, Inspiration	A positive emotion
<i>Disgust</i>		Aversion, Reject	Contempt, Irritation	A negative emotion

The place of emotions in the tourism experience managed by destinations

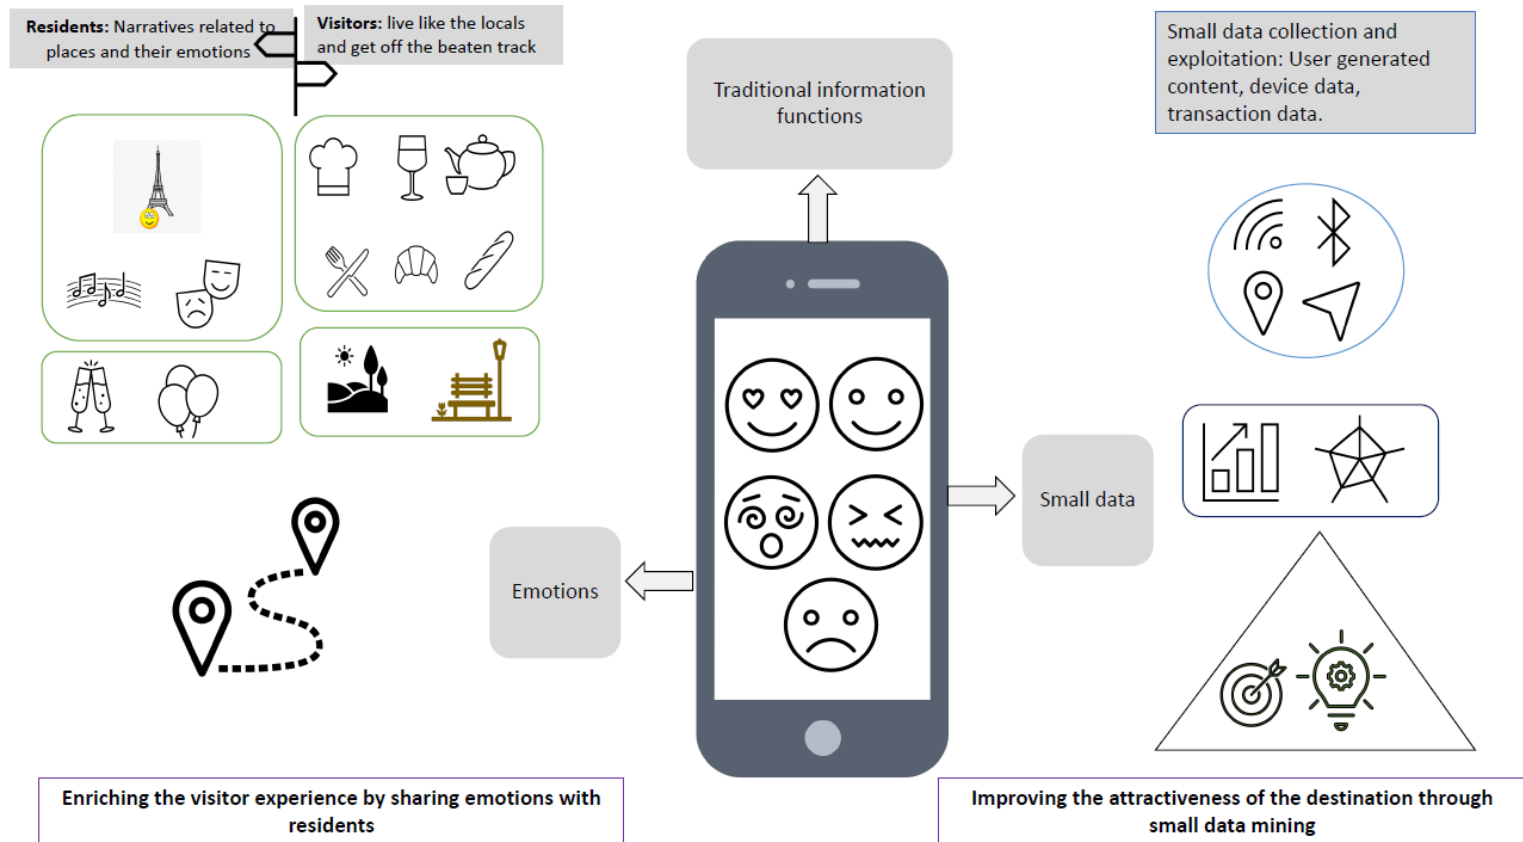

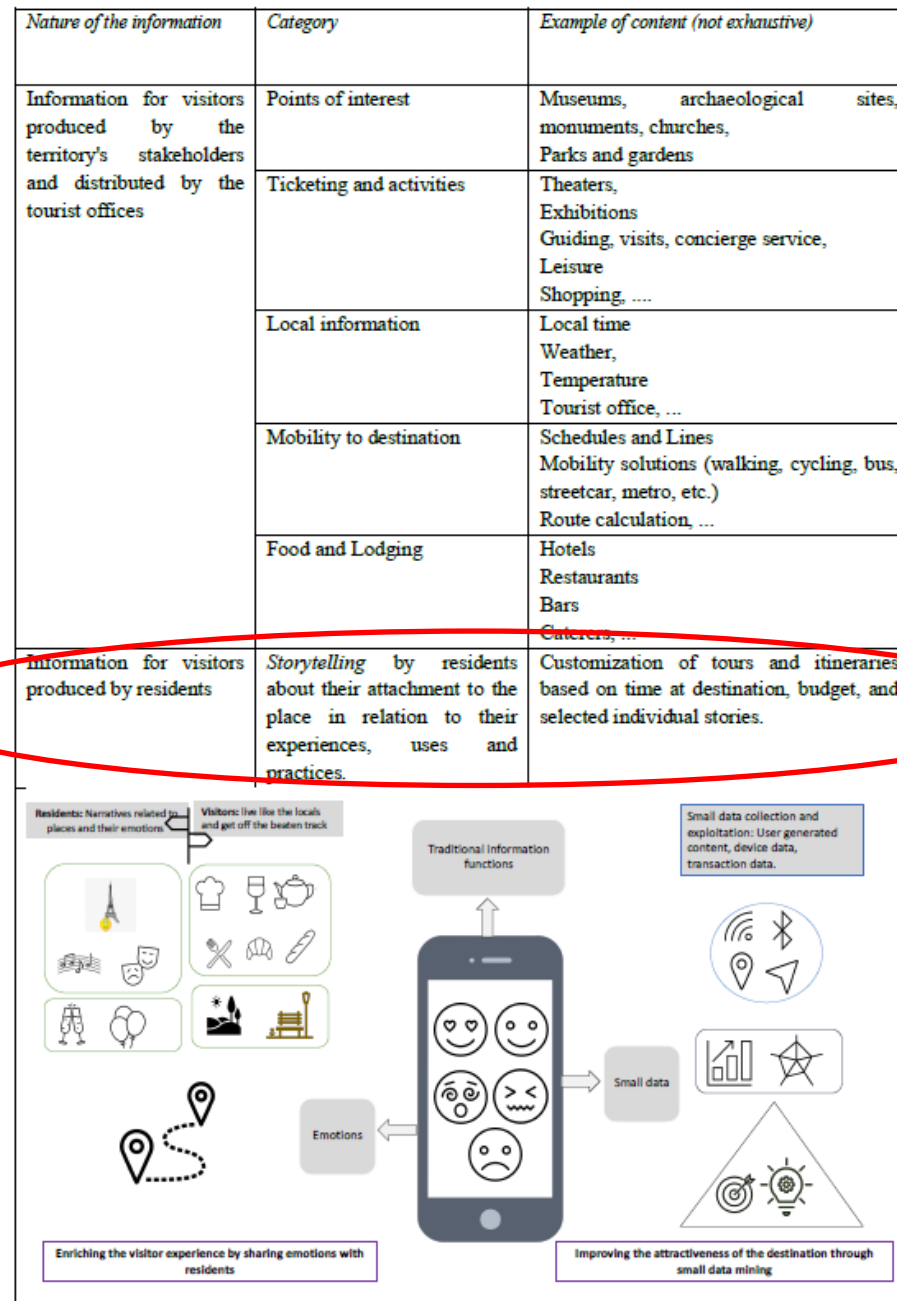

Figure 1 - The place of emotions in the tourism experience managed by destinations

What can we do with this data?

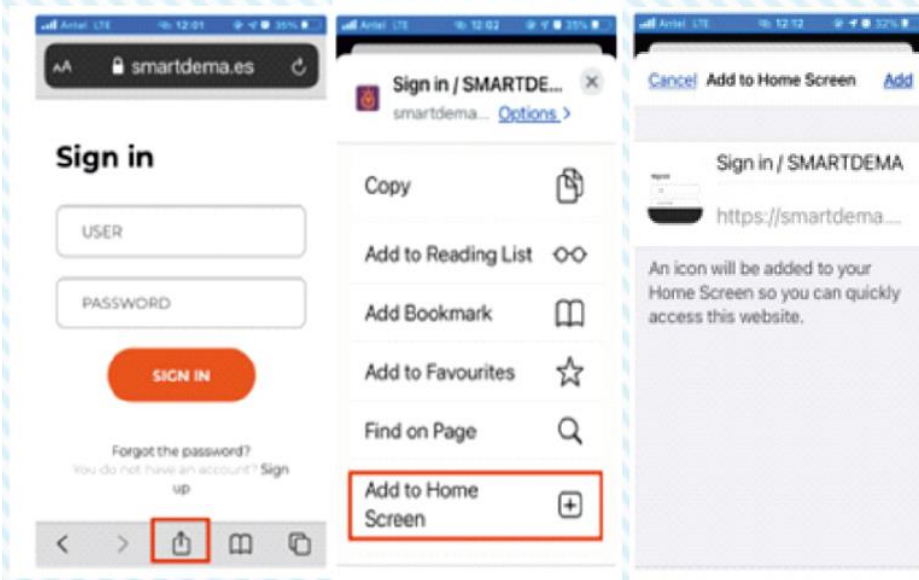

- By proposing to visitors to express their emotion(s) by selecting from a panel of emoticons, it then becomes possible to capture moments of satisfaction (positive emotion) and moments of disappointment (negative emotions).
- The use of location data will make it possible to associate a place/point of interest with the emotions expressed.
- Thanks to the app., we can capture the sense of emotion expressed by visitors/users
- The data generated by the app. promote an understanding of visitors' needs and behaviour to improve and individualise the tourism offer.
- Ways for destinations to stand out and differentiate themselves.
- It would be possible to respond to the following questions:
 - how can a destination be enhanced through emotion?
 - how a destination can explore visitors' emotions during and after their journey
 - how to make their visits enriching experiences.

STEP BY STEP USE OF THE WEB APP

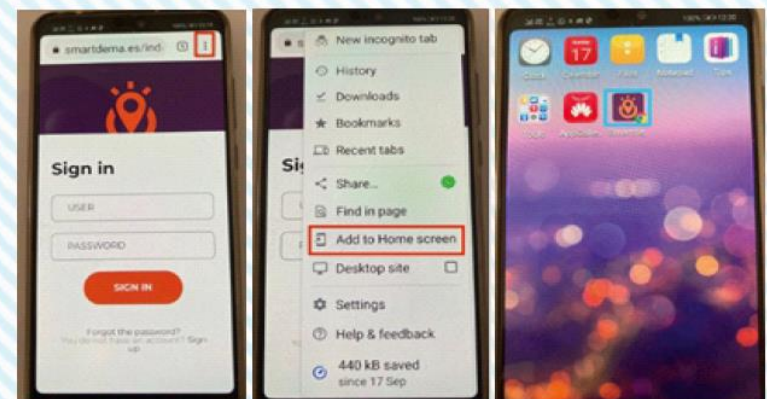

How to make an icon of the Web App for IOs Phones?

- Open SAFARI browser
- Type the web address smartdema.es
- Click on the red icon, and a new window will open
- Logged in once and you stayed logged
- 7Scroll down and click on Add to home screen
Name the App SMARTDEMA.

How to create the icon App for Android?

- Type on the browser smartdema.es.
- The screen below will appear click on the three dots and new window will display.
- Tap on the Add to Home Screen.

HOW TO POST A STORY?

The stories are geolocated. Your post and stories will appear by clicking on the MAP icon.

The MAP icon takes you to your last position when you used the App. If you were in Paris, it takes you to Paris. To locate you at the point you are now. The MAP has a tool on the right side just below the satellite layer. If you are still in Paris, no problem, keep the position.

To post the Story, you click on the map where the Story is happening or happened.

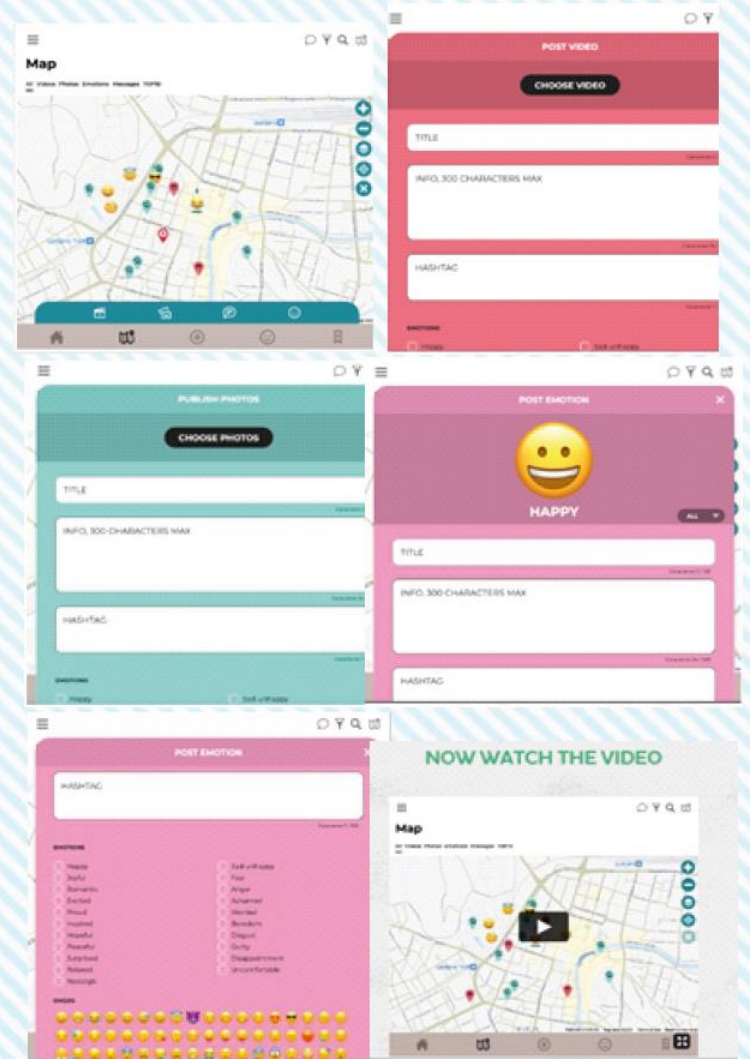

The App puts a red PIN and opens a dialogue tab. In this dialogue tab, you can see a video, photos, text, emojis, and icons graphic interface.

Each icon has a different colour. Once the red PIN is on the MAP, you choose the kind of media you want to upload. It can be simple 300 character text, a photo, a video or just emojis. Story text must exist in all formats.

On the MAP, you will see your Story but other people's stories as well.

Each Story has a different Media.

Media refers to video, photo, emoji...

Kaja 2022.04.07

400 years ago, a mighty linden tree stood next to the Hercules fountain (today only a replica of the baroque one) on Stari trg. In the well-known Slovenian poem Povodni mož, a dance took place under it, from which the waterman dragged the vain girl Urška into the Ljubljana river. "The whirlwind was seen by the boatmen, but no one saw the Urške anymore." Brrr, the last lines make you cringe...

Surprised 🤔 🤔 🤔

I trained as a ballerina in this building for several years. Busy... but worth it. Even today, when I pass by, I listen to the sound of the piano and the instructions of the dance teachers. The windows are covered with frosted glass, but if you're lucky, they close them a little in the summer and you can catch a glimpse of the young aspiring ballet dancers... cute

The river that flows through the city, with its reflections, makes the view even more beautiful and in the summer months pleasantly cools everyone who sits down by it. It used to be used by maids to wash clothes, but today we only see a diver here and there on a cleaning campaign in contact with the water. To actually wash something in the water... no, I don't think it would be possible. That's why we prefer to sit in cafes and chat with friends next to it.

The street that connects the bus and train station with the city center and along which I walked every day during my high school and university years to the gymnasium or to the college. Only later did I learn that this is the street on which most pedestrians walk on a daily basis. It is surrounded by colorful Art Nouveau palaces, which you can admire while passing by.
