Target Group

- 1. Participants in SMARTDIMA Project
- 2. University Students
- 3. Anyone who is interested in combining both education and tourism open digital badges on teacher degree content modules
- 4. People interested in tourism destination management

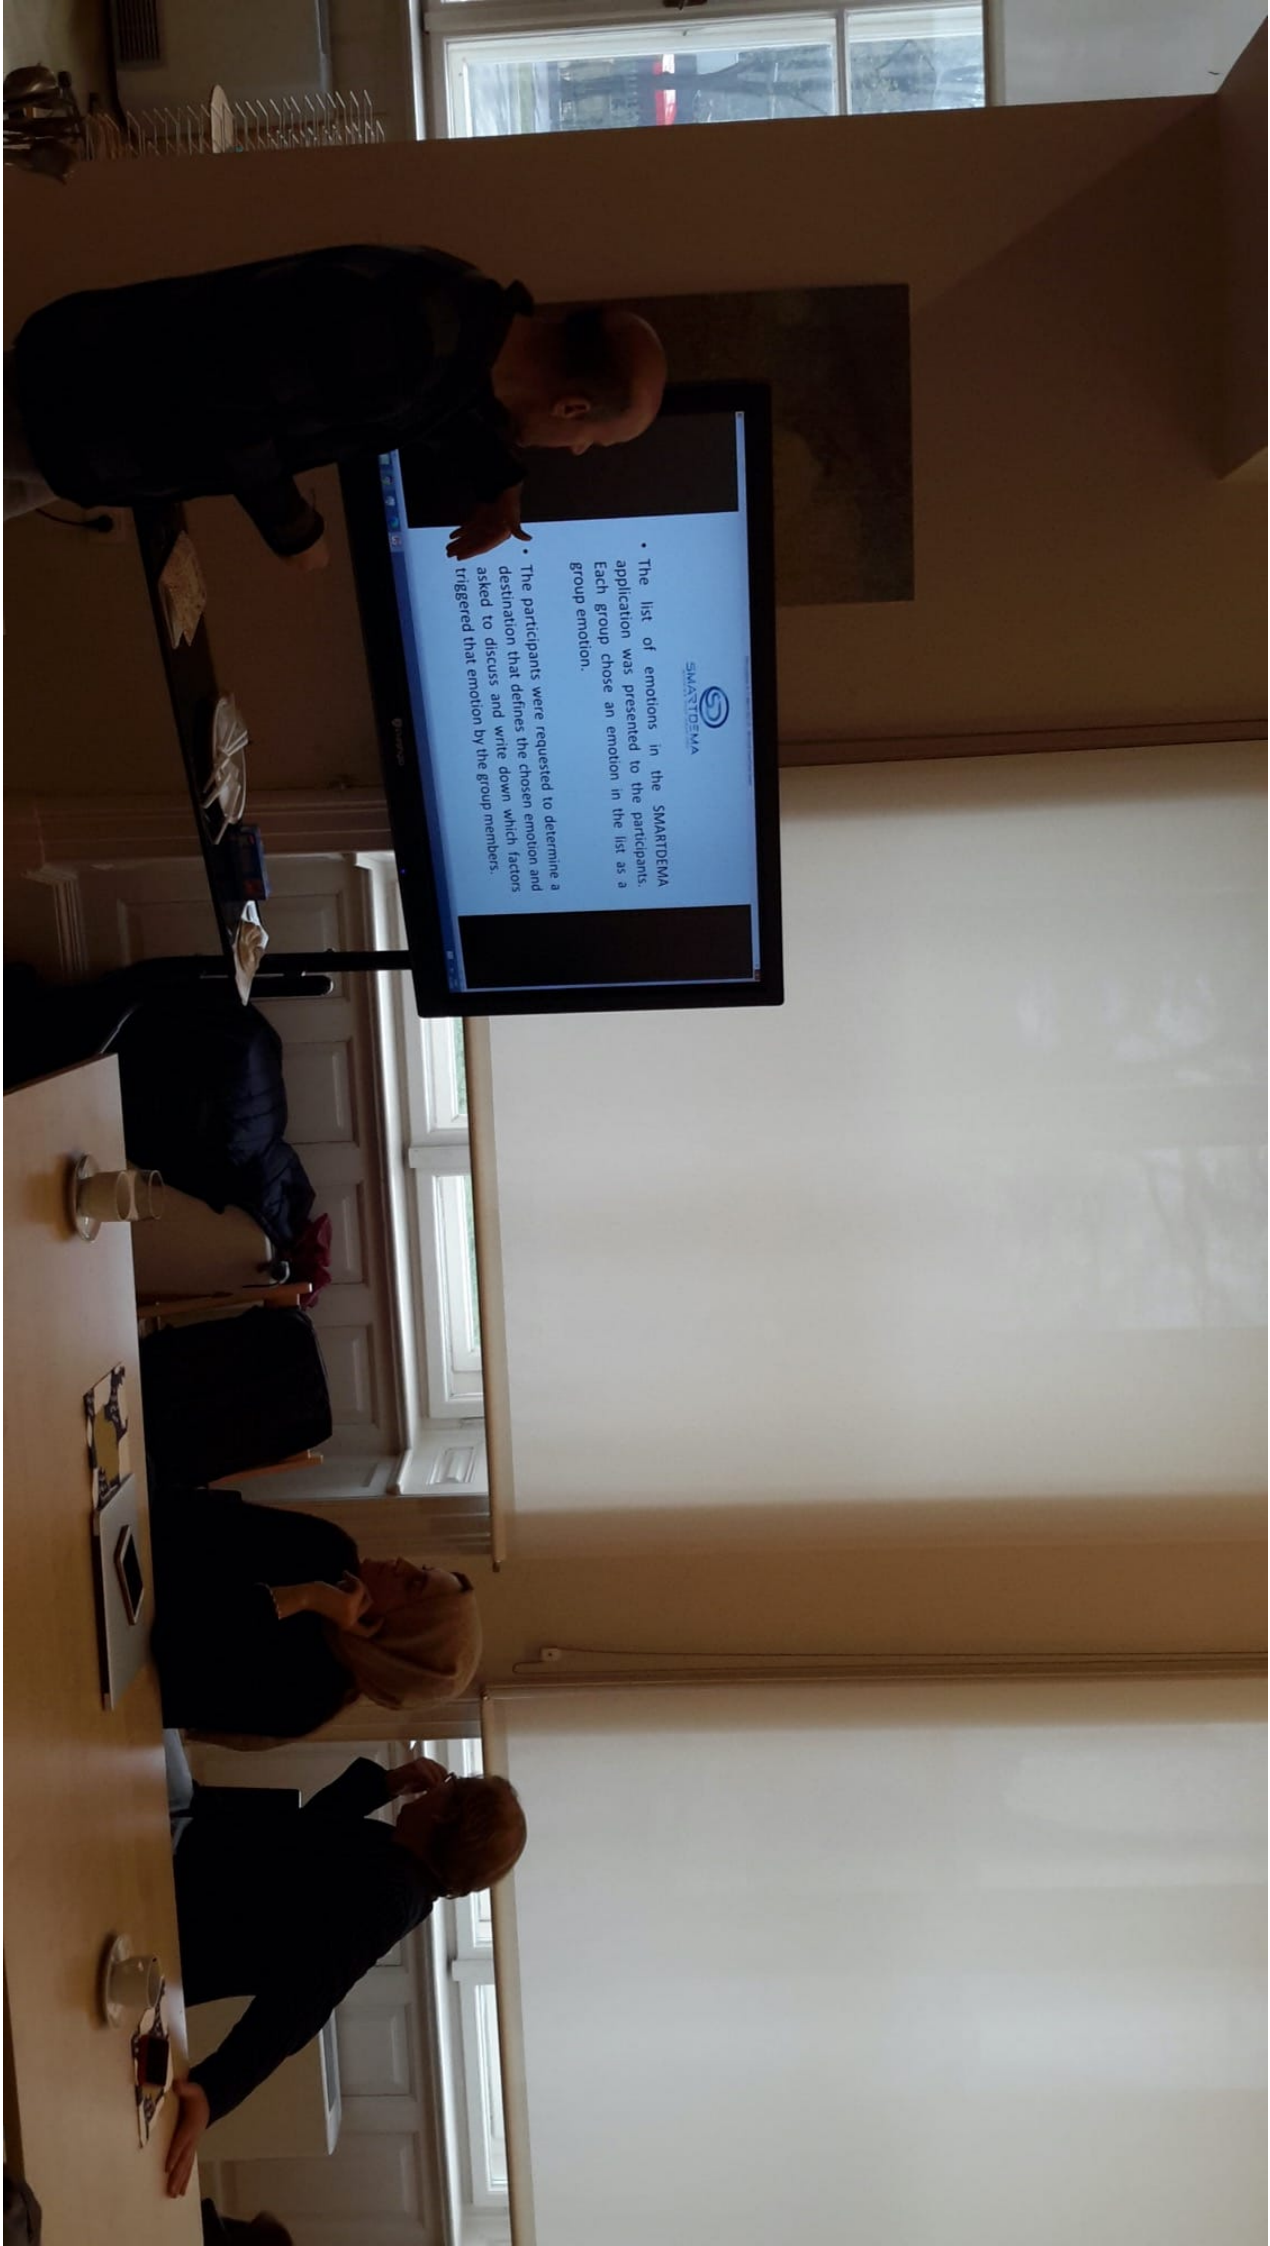

SADATIRIKA

The purpose of this multiplatform event is to present the SADATIRIKA project to the wide audience of the tourism community and the dissemination of APP to various stakeholders on time and neighbouring cities, such as Apple, Bendi and Marinka.

- The list of emotions in the SMARTIDEMA application was presented to the participants. Each group chose an emotion in the list as a group emotion.
- The participants were requested to determine a destination that defines the chosen emotion and asked to discuss and write down which factors triggered that emotion by the group members.

Improvement suggestions

1. Price tested and analysed with the SCAMPK model, and the following suggestions:
 - a. Comments on the App were focused on the route feature in general terms, but, the facility to create different routes and classify them, by car, bus, bike, foot, drone, others.
 - b. The option to edit the route content as it is featured in the desktop and at the time of creating the stories to hide other people stories and to facilitate the route creation on the map.
2. The gamification aspect of the stories and routes.
